

Hospital and Healthcare

Support for hospitals and healthcare organizations that provide care and treatment services to people of all ages

In-Hospital Service

Direct one-to-one and unit support for patients who are experiencing severe behavioural, social, emotional, cognitive, and/or psychiatric difficulties during their hospital stay.

Pre-Admission / Alternative to Admission

We are available to provide direct community support to children, adolescents, adults, seniors and family members awaiting admission as an alternative to admission and/or during times of crisis.

Post Discharge

We assist in the rehabilitation process and transition back to home, school, and community reintegration.

Training Service

Our workshops and courses are designed to teach hospital staff, multidisciplinary teams, and volunteers how to deal with unpredictable patient behaviour.

Case Consultation Service

We provide behavioural plans for patients with severe behavioural disturbances. We also offer independent evaluation of patient behavioural programs and develop alternative strategies to assist staff in meeting complex behaviour needs of patients.

All service is provided on a fee-for-service basis.

Bartimaeus Behaviour Specialists

- Hold a university degree or college diploma
- Have a minimum of five years experience in the social services field
- Have excellent interpersonal skills
- Have current First Aid and CPR training
- Are covered by professional liability insurance
- Have the ongoing support of the Director/ Coordinator of Services
- Have undergone vulnerable sector and criminal background checks

We match our Behaviour Specialists' knowledge, abilities and expertise with each individual's needs. We believe that a positive fit between the individual and our Behaviour Specialist is vital for service effectiveness.
